Goya’s Mastery in Prints:
Los Desastres de la Guerra

Located on the edge of the UA campus, near the corner of Park and Speedway. General Information (520) 621-7567
HOURS: Tuesday – Friday: 9:00 am – 5:00 pm | Saturday – Sunday: Noon – 4:00 pm | Closed Mondays and University Holidays
Museum Admission is Always Free! Visit the University of Arizona Museum of Art on the web at artmuseum.arizona.edu
The University of Arizona Museum of Art presents Goya’s Mastery in Prints, a celebration of the graphic techniques and visionary achievements of Spanish Master Francisco José de Goya y Lucientes (1746-1828). These exhibitions present in succession the artist’s four most significant print suites — in first-edition imprints — on loan from the Meadows Museum at Southern Methodist University in Dallas, Texas.

This extraordinary cycle of exhibitions continues with Los Desastres de la Guerra (The Disasters of War, 1810-1820), inspired by Goya’s reaction to the Peninsular War of 1808-1814 — including the French invasion of Spain through brutal attacks on the civilian population, guerrilla retaliations against Napoleon Bonaparte’s armies, and the ravaging famine in Madrid — and the enormous impact of these events on the life of the nation.

Organized in numerical sequence, the 80 etchings in this suite emphasize Goya’s direct response to the horrific brutalities and human consequences of this war, alongside sharply satirical portrayals of political and religious corruption in its aftermath. The prints are grouped into three sections: war scenes (plates 2-47), famine scenes (plates 48-64) and the allegorical caprichos enfáticos (“emphatic caprices,” plates 65-80).

Instead, as Sonntag writes:

“...the images in the suite demonstrate Goya’s narrative as well as technical mastery. While they capture the artist’s response to a series of almost unthinkable contemporary circumstances, they seem better understood not as documentary reportage but as commentary, layered with metaphorical overtones that invite political, cultural and moral consideration.

As well, although debatably Goya’s own, the captions on the prints possess the quality of wild oratory. While they guide the viewer’s attention, they also create for the series an internal rhythm, connecting some in sequences of mounting narrative horror while allowing others to howl alone.

In Regarding the Pain of Others (2003), Susan Sontag places Goya’s Desastres in the context of the “iconography of suffering.” As she points out, Goya eschews, with startling originality, numerous longstanding pictorial conventions — common in religious and mythic depictions, or in heroic battlefields — that offer up suffering as a spectacle for viewing pleasure.

Instead, as Sonntag writes:

“The ghoulish cruelties in The Disasters of War are meant to awaken, shock, wound the viewer. Goya’s art, like Dostoyevsky’s, seems a turning point in the history of moral feelings and of sorrow — as deep, as original, as demanding. With Goya, a new standard for responsiveness to suffering enters art. The account of war’s cruelties is fashioned as an assault on the sensibility of the viewer. The expressive phrases in script below each image comment on the provocation. While the image, like every image, is an invitation to look, the captions, more often than not, insists on the difficulty of doing just that. A voice, presumably the artist’s, badgers the viewer: can you bear to look at this? One caption declares: One can’t look (No se puede mirar). Another says: This is bad (Esto es malo). Another retorts: This is worse (Esto es peor). Another shouts: This is the worst! (Esto es lo peor!). Another declares: Barbarians! (Barbaros). What madness! (Que locura!). cries another. And another: This is too much! (Fuerte cosa es!). And another: Why? (Por qué?). Through the difficult, terrible images of Los Desastres de la Guerra, Goya offers us both the historically specific and the timelessly universal: a vision of humanity compromised, complicit victors, no heroes, no redemption — just one faceless body pitted against the other, in futility.

Although Goya printed several early proofs during his lifetime, the complete suite of Los Desastres de la Guerra was first published in 1863, 35 years after his death, by the Royal Academy of San Fernando.

Francisco José de Goya y Lucientes

Born on March 30, 1746 in the Spanish village of Fuendetodos, Francisco de Goya would prove to be one of the most innovative and provocative artists of all time.

Although he came of artistic age surprisingly late in life, Goya produced a revolutionary and unforgettable oeuvre.

The young Goya sought education through studio apprenticeships and travel, yet it was not until 1773 that he was formally engaged as an artist. By painting tapestry cartoons for the Royal Tapestry Workshop in Madrid, he garnered the attention of the Spanish royal court. In the years following, Goya found increasing favor among noble society and received many distinguished portrait commissions.

In 1777 and 1778, Goya executed his first etchings, copies of paintings by the highly regarded 17th-century Spanish court painter, Diego Velázquez (1599-1660).

By 1797, Goya was at work on a suite of satirical etchings, known as Los Caprichos (which were published in 1799). In that same year, Goya was appointed First Court Painter and with the enhanced social access of the position produced his greatest aristocratic portraits—those marked by a distinctive and often unflattering realism.

In 1808, amidst the war against Napoleon in Spain, Goya’s world of court patronage dissolved; the artist found himself increasingly isolated and griped by psychological crisis. After the death of his wife, in 1812, the artist produced some of his most politically charged work, including the print suite Los Desastres de la Guerra.

Through his last years, Goya was astonishingly prolific—producing portraits, religious paintings and genre scenes, the series known as the Black Paintings, and various drawings and print suites, including La Tauromaquia and Los Disparates. Threatened by escalating political, social and artistic repression under the regime of Ferdinand v, Goya chose self-exile in 1824. He settled in Bordeaux where he died, on April 16, 1828, at age 82.
